

DRaaS Disaster Recovery

Simple. Cost Effective. Business Critical. Disaster Recovery.

ViaWest's DRaaS platform offers an easy to use and reliable DRaaS solution that is scalable to any business. Utilizing Zerto's technology, ViaWest replicates your virtual machines to a geographically diverse location, helping with quick recovery after a disaster, whether man-made or natural.

We understand that IT departments are stretched thin, so we make disaster recovery simple by offering hypervisor-based replication, continuous data protection, disaster recovery orchestration & automation with an offsite backup.

"ViaWest proved to us immediately that they could meet our needs. Our partnership with ViaWest will allow OptimalPath to maintain our reputation as a pioneer in the communications cloudware market, increase our competitive position, as well as reduce time from customer order, to turn up."

Max W. Adams
President - OptimalPath

Features of ViaWest DRaaS Platform

- Hypervisor-based replications for VMware offered at your site or current colocation facility
- ViaWest managed cloud capabilities
- Granular virtual machine protection with no snapshots or slowdown
- WAN optimization built in
- Storage agnostic replication
- Automated failover, failback & non-disruptive isolated testing
- One free annual failover testing
- Tiered storage for applications-based performance requirements
- RPOs from minutes and RTOs from one hour, each based on the complexity of the client's environment

Disaster Recovery on the Ground or in the Cloud

Protecting data is important, but the ability to recover applications efficiently and quickly is essential in restoring operations and business as usual. When you consider the true cost of downtime, beyond immediate lost revenue and production, it can damage brand, reputation and client commitments.

Because most organizations do not have the time, energy, capital, or expertise to manage a recovery strategy effectively, ViaWest created the DRaaS platform to offer clients a simple and cost-effective Disaster Recovery (DR) product that is scalable to any business.

Partnering with ViaWest allows clients to put a Disaster Recovery plan in place to help in the event of a disaster by providing expert advice, counsel and testing on each individualized solution. Your company does not work in a one size fits all environment and your Disaster Recovery plan shouldn't either.
