

# ViaWest Private Cloud

## Your data. Your applications. Your Cloud.

ViaWest's Private Cloud is ideal for elastic computing performance and agility. Our Private Cloud provides a high-end combination of technologies from Cisco and VMware with certified cloud experts to help you design and implement a successful cloud strategy. Private Cloud solutions are available with managed and unmanaged services and designed to reduce costs and enhance the quality of the services delivered to business users and clients.

ViaWest's team of experts will work with you to understand your specific business goals, technical requirements and security needs. We'll design and implement a private cloud environment that is optimized for your business. That's why ViaWest has the highest client satisfaction rating in the cloud hosting industry.

### Cloud Cover Where You Need It

A recent study by the Ponemon Institute showed the average data breach cost for a company at \$3.8 million, with the average cost per lost or stolen record at \$154.

- Operating systems support, including
  - CentOS®
  - Red Hat®
  - Windows® Server
  - Ubuntu
- Database support
  - Microsoft SQL
  - MySQL
  - PostgreSQL
  - Mongo DB
- Dedicated or Shared Storage

# Private Cloud Key Benefits

The ViaWest Private Cloud offers you the ability to configure a secure cloud environment with increased flexibility and maximum performance. Private Cloud can reduce costs and enhance the quality of the services delivered to business users and clients. Most importantly, it can reduce the time it takes to create and deploy new products and services.

**Key benefits include:**

- Host websites and business applications
- Reduce the time and cost associated with infrastructure management and hardware maintenance
- Enable agility and efficiency of the cloud in a customized environment accessible only to your organization

ViaWest has designed the Private Cloud platform to maximize performance and minimize cost. Selecting the right mix of resources and the right partner has much to do with the success of your Hybrid IT strategy.
