

# Network Protection

## Hybrid of Security

With ViaWest's Network Protection we simplify how our customers secure information. By implementing procedures and processes designed to secure data monitoring 24/7 for intrusion and breaches, we allow customers to pursue their business ambitions without unnecessary security worry. If the Internet is the lifeline of your business, make sure you are connected 24/7 with security tools and personnel to safeguard what's important to you.

Nearly every company in 2014 was hit by a cyber-attack, costing them hundreds of thousands, potentially millions, of dollars. The current estimate is 42.8 million cyberattacks, roughly 117,339 attacks each day, says a study by consulting firm

**PricewaterhouseCoopers**

## Network Protection Features

- Comprehensive network and security services dedicated to each customer
- Security experts to review logs daily
- Security event and threat response time averaging 60 seconds or less
- Option to deploy physical virtual or cloud-based solutions
- Every service is deployed with a fully managed Security Operations Center infrastructure
- Each feature includes SIEM and event correlation by technology – and analysis by trained security analysts
- Multiple features available to build out a threat response to typical attack templates

# Network Protection Security Bundles

ViaWest has created easy-to-implement security bundles built to address the ever changing threat landscape of today's always-on business environment.
